Professional Experience

- **Assistant Professor (tenure-track)** 2019.08-present
Department of Population & Quantitative Health Sciences
Case Western Reserve University School of Medicine
- **Member** 2019.08-present
Case Comprehensive Cancer Center
Case Western Reserve University

Education

- **Ph.D. in Biostatistics and Bioinformatics** 2014-2019
Emory University, Laney Graduate School
— Advisor: Dr. Hao Wu
— Dissertation committee members: Dr. Zhaohui Steve Qin, Dr. Peng Jin, Dr. Karen Conneely
— Dissertation: *Statistical Methods for High-throughput Epigenomics Data.*
[** Michael Kutner Distinguished Doctoral Student Award **]
- **MSPH in Biostatistics and Bioinformatics** 2011-2013
Emory University, Rollins School of Public Health
— Advisors: Hao Wu, Karen Conneely
— Thesis: *A Hierarchical Bayesian Approach to Detect Differentially Methylated Loci from Bisulfite Sequencing Data*
- **B.S. in Biosciences** 2007-2011
University of Science and Technology of China (USTC)

Past Work Experience

- **May 2017–August 2017, Statistician/Full-Time Summer Intern** Pfizer Inc, Global Research & Development, La Jolla, California
— Developing Bayesian methods for tumor growth inhibition study
- **June 2013–April 2014, Data Analyst**, Department of Human Genetics, School of Medicine, Emory University, Atlanta, Georgia.
— Statistical model development and data analysis for high-throughput data

Research Interests

- Statistical Methodology: Biostatistics, Bioinformatics, Computational methods in high-throughput *-omics* data, Signal deconvolution, Single-cell DNA methylation.
- Applications: Cancer epigenetics/epigenomics, computational biology, cell-free DNA, biomarker discovery, neurodegenerative diseases, PTSD.

Publications

Google Scholar citation statistics (as of June 2024): All citations: 1627.

h-index: 14. i10-index: 16.

† = These authors contributed equally to this work.

* = Corresponding author.

underline = lab member and trainee.

Statistical Methodology Publications

1. Guanqun Meng, Yue Pan, Wen Tang, Lijun Zhang, Ying Cui, Fredrick R. Schumacher, Ming Wang, Rui Wang, Sijia He, Jeffrey Krischer, Qian Li*, **Hao Feng***. *imply: improving cell-type deconvolution accuracy using personalized reference profiles*. (2024) **Genome Medicine**.
2. Zhenxing Guo[†], Daoyu Duan[†], Wen Tang, Julia Zhu, William S. Bush, Liangliang Zhang, Xiaofeng Zhu, Fulai Jin, **Hao Feng***. *maggie: a power evaluation method for differential RNA methylation analysis in N6-methyladenosine sequencing*. (2024) **PLOS Computational Biology**.
3. **Hao Feng***, Guanqun Meng, Tong Lin, Hemang Parikh, Ziyi Li, Jeffery Krischer, Qian Li*. *ISLET: individual-specific reference panel recovery improves cell-type-specific inference*. (2023) **Genome Biology**.
4. Daoyu Duan, Wen Tang, Runshu Wang, Zhenxing Guo*, **Hao Feng***. *Evaluation of epitranscriptome-wide N6-methyladenosine differential analysis methods*. (2023) **Briefings in Bioinformatics**.
5. Guanqun Meng, Wen Tang, Emina Huang, Ziyi Li, **Hao Feng***. *A comprehensive assessment of cell type-specific differential expression methods in bulk data*. (2023) **Briefings in Bioinformatics**.
6. Daoyu Duan, Sijia He, Emina Huang, Ziyi Li*, **Hao Feng***. *NeuCA web server: a neural network-based cell annotation tool with web-app and GUI*. (2022) **Bioinformatics**.
7. Ziyi Li*, **Hao Feng***. *A neural network-based method for exhaustive cell label assignment using single cell RNA-seq data*. (2022) **Scientific Reports**.
8. **Hao Feng**, Hao Wu. *Differential methylation analysis for bisulfite sequencing using DSS*. (2019) **Quantitative Biology**.
9. **Hao Feng**, Peng Jin, Hao Wu. *Disease prediction by cell-free DNA methylation*. (2018) **Briefings in Bioinformatics**.
10. Weiwei Zhang[†], **Hao Feng**[†], Hao Wu, Xiaoqi Zheng. *Accounting for tumor purity improves cancer subtype classification from DNA methylation data*. (2017) **Bioinformatics**.

11. **Hao Feng**, Karen N. Conneely, Hao Wu. *A Bayesian hierarchical model to detect differentially methylated loci from single nucleotide resolution sequencing data.* (2014) [Nucleic Acids Research](#).

Book Chapter

12. **Hao Feng**, Karen Conneely, Hao Wu. *Differential Methylation Analysis for Bisulfite Sequencing (BS-Seq) Data.* (2022) [Epigenome-Wide Association Studies](#). Methods in Molecular Biology book series. Humana Press, Springer.

Team Science Publications

13. Daxuan Deng, Lijun Zhang, **Hao Feng**, Vern M. Chinchilli, Chixiang Chen, Ming Wang. *Robust integration of secondary outcomes information into primary outcome analysis in the presence of missing data.* (2024) [Statistical Methods in Medical Research](#).
14. Wenzhang Wang, Fanpeng Zhao, Yubing Lu, Sandra L. Siedlak, Hisashi Fujioka, **Hao Feng**, George Perry, Xiongwei Zhu. *Damaged Mitochondria Coincide with Presynaptic Vesicle Loss and Abnormalities in Alzheimer's Disease Brain.* (2023) [Acta Neuropathologica Communications](#).
15. Moez Rathore, Wei Zhang, Michel'le Wright, Mehrdad Zarei, Ali Vaziri-Gohar, Omid Hajihassani, Ata Abbas, **Hao Feng**, Jonathan Brody, Sandy D. Markowitz, Jordan Winter, Rui Wang. *Liver Endothelium Microenvironment Promotes HER3-mediated Cell Growth in Pancreatic Ductal Adenocarcinoma.* (2022) [Journal of Cancer Science and Clinical Therapeutics](#).
16. Grace E Weber, Maria Khrestian, Elizabeth D Tuason, Yvonne Shao, Jagan Pillai, Stephen Rao, **Hao Feng**, Yadi Zhou, Feixiong Cheng, Tara M DeSilva, Shaun Stauffer, James B Leverenz, Lynn M Bekris. *Peripheral sTREM2-Related Inflammatory Activity Alterations in Early-Stage Alzheimer's Disease.* (2022) [The Journal of Immunology](#).
17. Grace E Weber, Maria Khrestian, Elizabeth D Tuason, Yvonne Shao, Jagan A Pillai, Stephen M Rao, **Hao Feng**, Tara M DeSilva, Shaun Stauffer, James B Leverenz, Lynn M Bekris. *Older adults with Alzheimer's disease exhibit an altered relationship between plasma sTREM2 and inflammatory markers.* (2021) [Alzheimer's & Dementia](#).

Funding Support

Current

- [1R01CA264320](#) (PI: Zhenghe Wang) 08/06/2021 — 07/31/2026
NIH/NCI
Mechanisms of PIK3CA helical domain mutations driving colorectal tumorigenesis
Role: Biostatistician

- 1R01 AG066526 (PI: Wen-Cheng Xiong) 09/15/2020 — 08/31/2024
NIH/NIA
LRP4 deficiency in Alzheimer's disease development
Role: Biostatistician
- 1R01HD105892 (PI: Adonis Hijaz) 08/20/2021 — 07/31/2026
NIH/NICHHD
Patient-Centered Outcomes of Sacrocolpopexy versus Uterosacral Ligament Suspension for the Treatment of Uterovaginal Prolapse
Role: Biostatistician
- W81XWH2110804 (PI: Mei Zhang) 09/01/2021 — 08/31/2024
DoD
BG34-200 Triggers Myeloid Recruitment and M1 Re-programming to Enhance Immunotherapy for Pediatric and AYA Osteosarcoma
Role: Biostatistician
- P30AG072959 (PI: Jonathan Haines) 09/01/2021 — 06/30/2026
NIH/NIA
Cleveland Alzheimers Disease Research Center (CADRC) Data Management and Statistics Core
Role: Biostatistician
- U01NS100610 (PI: Jordan Winter) 09/01/2023 — 08/31/2025
NIH/NCI
Targeting pancreatic cancer's metabolic addiction to HuR
Role: Biostatistician
- U01NS100610 (PI: James Leverenz) 09/01/2022 — 08/31/2027
NIH/NINDS
Dementia with Lewy Bodies Consortium
Role: Biostatistician

Completed

- IRG-16-186-21 (PI: Hao Feng) 08/01/2022 — 07/31/2023
American Cancer Society Institutional Research Grants (ACS IRG) pilot award, through Case Comprehensive Cancer Center
Jointly Profiling Microbiome and Transcriptome in Pancreatic Cancer Metastasis
Role: PI
- CASE60007 (PI: Hao Feng) 01/01/2022 — 12/31/2022
Corinne L. Doderer Foundation for the Arts and Sciences
Data Harmonizing and Cell Label Prediction Methods in Autism Single-cell RNA-seq Data
Role: PI
- R01CA237304 (PI: Emina Huang) 03/01/2019 — 02/29/2023
NIH/NCI
The miR-20/c-Myc/E2F Regulatory Axis is Critical for the Tumor Promoting Activity of Inflammatory Fibroblasts in Colitis-Associated Cancer
Role: Biostatistician

- ID: 605146 (PI: Alex Huang)
St. Baldrick's Foundation
High Impact Research for Pediatric Osteosarcoma
Targeting myeloid and lymphoid immune tolerance in metastatic osteosarcoma
Role: Biostatistician

11/01/2018 — 10/30/2021

Honors and Awards

- **UCITE Learning Fellowship Award**, 2021
- **Senior Ph.D. Student Presentation Award**, 2018
- **ENAR Distinguished Student Paper Award**, 2017
- **Michael Kutner Distinguished Doctoral Student Award**, 2017
- **SAMSI trave award** for epigenetics workshop, 2015
- Finalist for the **Charles C. Shepard Award**, 2013
— The best master's thesis of the Rollins School of Public Health
- **Outstanding Student Scholarship** from USTC Overseas Alumni Foundation, 2007

Software Packages

- **ISLET**: Individual-Specific cell type referencing tool. An R/Bioconductor package deconvolute mixture samples and obtain the individual-specific and cell-type-specific reference panels. Available on Bioconductor: <https://bioconductor.org/packages/ISLET/>.
- **magpie**: This package aims to perform power analysis for the MeRIP-seq study. It calculates FDR, FDC, power, and precision under various study design parameters. Available on Bioconductor: <https://bioconductor.org/packages/magpie/>.
- **NeuCA**: Neural network-based cell type annotation tool. Available at <https://bioconductor.org/packages/NeuCA/>.
- **DSS**: Dispersion Shrinkage for Sequencing. An R/Bioconductor package for differential analysis from high-throughput sequencing data, including differential expression for RNA-seq and differential methylation for bisulfite-sequencing data. Available at <https://bioconductor.org/packages/DSS/>.
- **InfiniumPurify**: A comprehensive R package for estimating and accounting for tumor purity based on DNA methylation Infinium 450k array data. 'InfiniumPurify' provides functionalities for tumor purity estimation. In addition, it can perform differential methylation detection and tumor sample clustering with the consideration of tumor purities. Available at <https://cran.r-project.org/web/packages/InfiniumPurify/index.html>.
- **cfDNAMethy**: Reference-free and reference-based methods for disease prediction by cell-free DNA methylation. Available at <https://github.com/haoharryfeng/cfDNAMethy>.

Presentations

Invited

- MidSouth Computational Biology and Bioinformatics Society (MCBIOS) 2024, Atlanta GA. March, 2024.
— Personalized cell-type-specific omics profile deconvolution and inference.
- Departmental Seminar Series, Wayne State University, Center for Urban Responses to Environmental Stressors (CURES), Detroit MI. November, 2023.
— Personalized cell-type-specific omics profile deconvolution and inference.
- Joint Statistical Meetings (JSM), Toronto, Ontario, Canada. August, 2023.
— Individual-specific and cell-type-specific gene expression reference panel deconvolution.
- International Chinese Statistical Association (ICSA) International Conference, Hong Kong SAR, China. July, 2023.
— Individual-specific and cell-type-specific gene expression reference panel deconvolution.
- International Biometric Society (IBS) — the Western North American Region (WNAR), Anchorage, AK. June, 2023.
— Individual-specific and cell-type-specific gene expression reference panel deconvolution.
- Case Comprehensive Cancer Center seminar series. April, 2023.
— Signal deconvolution methods development in *-omics* data.
- Departmental Seminar Series, University of Pittsburgh. Pittsburgh, PA. December, 2022.
— Individual-specific and cell-type-specific gene expression reference panel deconvolution.
- Departmental Seminar Series, University of South Carolina Statistics Department. Columbia, SC. October, 2022.
— Individual-specific and cell-type-specific gene expression reference panel deconvolution.
- Bioconductor Asia 2021, Tokyo, Japan. November, 2021.
— NeuCA: a neural network-based method for exhaustive cell label assignment using single cell RNA-seq data.
- Joint Biostatistics Symposium 2021, Columbus, OH. May, 2021.
— NeuCA: a neural network-based method for exhaustive cell label assignment using single cell RNA-seq data.
- University Hospitals Seidman Cancer Center, Cleveland, OH. November, 2020.
— Omics data in cancer research.
- The University of Alabama at Birmingham, Birmingham, AL. March, 2019.
— Statistical methods for high-throughput epigenomics data.
- Case Western Reserve University, Cleveland, OH. March, 2019.
— Statistical methods for high-throughput epigenomics data.
- University of Missouri – Columbia, Columbia, MO. January, 2019.
— Statistical methods for high-throughput epigenomics data.

Topic-contributed, Contributed, and others

- STATGEN 2024, Pittsburgh, PA. May, 2024.
— Personalized cell-type-specific omics profile deconvolution and inference.
- JSM 2022, Washington DC, USA. August, 2022
— NeuCA: a neural network-based method for exhaustive cell label assignment using single cell RNA-seq data.

- ENAR 2022, Houston, TX, USA. March, 2022
— NeuCA: a neural network-based method for exhaustive cell label assignment using single cell RNA-seq data.
- Affordable Cancer Technology 2021 (ACT 2021), Virtual, USA. October, 2021
— NeuCA: a neural network-based method for exhaustive cell label assignment using single cell RNA-seq data.
- Senior Ph.D. students presentation competition, Emory University, Atlanta, GA. September, 2018
— Statistical methods for high-throughput epigenomics data.
- Pfizer Global Research and Development, La Jolla, CA. August, 2017
— A Bayesian method in tumor growth inhibition study.
- JSM 2017, Chicago, IL. August, 2017
— Accounting for tumor purity improves cancer subtype classification from DNA methylation data.
- ENAR 2017 Spring meeting, Washington, DC. March, 2017
— Accounting for tumor purity improves cancer subtype classification from DNA methylation data.
[** ENAR Distinguished Student Paper Award **]
- Statistical and Applied Mathematical Sciences Institute (SAMSI) workshop, Research Triangle Park, NC. March, 2015
— A Bayesian hierarchical model to detect differentially methylated loci from single nucleotide resolution sequencing data.
- American Society of Human Genetics (ASHG) 63rd annual meeting, Boston, MA. October, 2013
— A Bayesian hierarchical model to detect differentially methylated loci from single nucleotide resolution sequencing data.

Teaching

Instructor

- PQHS 471: **Machine Learning and Data Mining**. [3 credits] (2021 – current). Department of Population & Quantitative Health Sciences, Case Western Reserve University School of Medicine.
- PQHS 701: **Ph.D. Dissertation Research**. [varied credits] (2023 – current). Department of Population & Quantitative Health Sciences, Case Western Reserve University School of Medicine.
- PQHS 499: **Independent Study on Modern Regression Methods**. [6 credits] (2022 – 2023). Department of Population & Quantitative Health Sciences, Case Western Reserve University School of Medicine.
- STAT 395: **Senior Project in Statistics**. [3 credits] (2022). Department of Mathematics, Applied Mathematics, and Statistics, Case Western Reserve University College of Arts and Sciences.

Guest Lecturer

- PQHS 401: Research Seminar for MS program in Biostatistics. (Spring 2024 – current). *High-throughput Bioinformatics Data Analysis*. Department of Population & Quantitative Health Sciences, Case Western Reserve University School of Medicine.
- PQHS 452: Statistical Methods in Human Genetics. (Spring 2021 – current). *Multiple Testing and Statistical Power*. Department of Population & Quantitative Health Sciences, Case Western Reserve University School of Medicine.
- PQHS 457: Current Issues in Genetic Epidemiology: Design and Analysis of Sequencing Studies. (Spring 2020 – current). *Epigenetics and Its Statistical Methods*. Department of Population & Quantitative Health Sciences, Case Western Reserve University School of Medicine.

Group Discussion Facilitator

- (2024 – current) IBMS 500: **On Being a Professional Scientist**, Case Western Reserve University School of Medicine.

Short Courses and Tutorials

- (2023 Spring ENAR Meeting) ENAR Tutorials: **Cell-type-aware Differential Analysis for Bulk Transcriptome Data**. International Biometric Society (IBS) – ENAR.

Teaching Associate

- BIOS 731: **Advanced Statistical Computing**. (2018). Department of Biostatistics and Bioinformatics, Emory University Rollins School of Public Health.
- BIOS 738: **Bayesian and Empirical Bayesian Methods**. (2017). Department of Biostatistics and Bioinformatics, Emory University Rollins School of Public Health.
- BIOS 555: **High-throughput data analysis using R and Bioconductor**. (2016). Department of Biostatistics and Bioinformatics, Emory University Rollins School of Public Health.

Teaching Assistant

- BIOS 550: **Sampling Applications**. (2016). Department of Biostatistics and Bioinformatics, Emory University Rollins School of Public Health.
- BIOS 500: **Statistical Methods I**. (2015). Department of Biostatistics and Bioinformatics, Emory University Rollins School of Public Health.

Mentoring

Doctoral trainees

- Daoyu Duan, Ph.D. candidate in Epidemiology and Biostatistics
- Guanqun (Leslie) Meng, Ph.D. candidate in Epidemiology and Biostatistics

Dissertation committee

- Yanning Wu (2024 -), Ph.D. candidate in Epidemiology and Biostatistics
- Aditi Singh (2023 -), Ph.D. student in Wayne State University

- Noah Lorincz-Comi (2021 - 2024), Ph.D. candidate in Epidemiology and Biostatistics
- Xueyi Zhang (2021 - 2024), Ph.D. candidate in Epidemiology and Biostatistics
- Michael Osterman (2020 - 2023), Ph.D. student in Epidemiology and Biostatistics
- Bowen Jin (2021 - 2023), Ph.D. student in Systems Biology and Bioinformatics
- Zuxi (Terry) Cui (2020 -), Ph.D. candidate in Epidemiology and Biostatistics
- Ju Zhang (2019 - 2021), Ph.D. candidate in Epidemiology and Biostatistics

Rotation graduate students

- Chenyu Liu (2023 - 2024), Ph.D. student in Epidemiology and Biostatistics
- Katrina Prantzas (2020 - 2021), Ph.D. student in Biomedical and Health Informatics
- Dipak Prasad Upadhyaya (2020 - 2021), Ph.D. student in Biomedical and Health Informatics
- Jing Zhang (2019 - 2020), Ph.D. candidate in Epidemiology and Biostatistics
- Shiyang Liu (2019 - 2020), Ph.D. candidate in Epidemiology and Biostatistics

Masters students

- Capstone Project Committee for Nicolas Kaplan (2019 - 2021), MPH candidate

Visiting students

- Aditi Singh (2022), Graduate Student, Wayne State University, Center for Molecular Medicine and Genetics.

Undergraduate students and high school students

- Sijia He (2021-2022), CWRU, undergraduate capstone.
- Julia Zhu (2021), Hathaway Brown School, summer research project.

Service Activities

Committee service

- 2023 - current, Member, PQHS departmental Committee on Appointments Promotions and Tenure (dCAPT)
- 2023 - current, Member, CWRU School of Medicine (SOM) Curriculum Committee
- 2022 - 2024, Chair, PQHS departmental seminar series committee
- 2021- current, Member, Biomedical & Health Informatics (BHI) admission and curriculum committee
- 2019 - 2021, Member, Biostatistics Faculty Search Committee
- 2020, Member, Epidemiology and Biostatistics Ph.D. Admission Committee
- 2020, Member, PQHS Student Activity Committee
- 2019, Member, Emory Biostatistics Department Website Committee

Conference program

- Organizer and Chair: STATGEN 2024, Topic-contributed Session “Dissecting and testing heterogeneous transcriptome and chromatin signals.” STATGEN 2024: Conference on Statistics in Genomics and Genetics, Pittsburgh, PA. May 2024.
- Program Committee: IEEE International Conference on Bioinformatics and Biomedicine (IEEE BIBM). 2022 & 2023.
- Organizer: JSM, Topic-contributed Session “Methodological Advances in Cell Type Deconvolution and Discrimination.” JSM 2023, Toronto, Ontario, Canada. August 2023.
- Chair: “WNAR 2023 session – Speed Talk 1”. WNAR 2023, Anchorage, AK. June 2023.
- Organizer and Chair: ICSA Applied Statistics Symposium, Invited Session “Statistical Methods Development in Single-cell Genomics and Multi-omics Data.” ICSA Applied Statistics Symposium, Ann Arbor, MI. June 2023.
- Award Committee: ENAR conference poster award committee. 2023
- Chair: “ENAR session – Contributed Papers: Genomics”. ENAR 2022, Houston, TX. March 2022.
- Organizer and Chair: Invited Session “Statistical method advancement for analyzing omics data”. ICSA 2020 Applied Statistics Symposium, Houston, TX. December 2020.

Grant review

- National Science Foundation (NSF), Graduate Research Fellowship Program (GRFP). Panel Reviewer. 2024.
- Department of Defense (DoD) Congressionally Directed Medical Research Programs (CDMRP), Biostatistician Specialist Reviewer. 2022-2024.
- National Institutes of Health (NIH) Genomics, Computational Biology and Technology (GCAT) Study Section, Early Career Reviewer. 2023.
- Invited Reviewer for Sector Innovation Program at Genome British Columbia (GENOME BC), Vancouver, BC, Canada. May 2020.

Editorial Activities

Editorial board member

- International Journal of Computational Biology and Drug Design (2020-2023)

Journal Reviewer

- Aging, American Journal of Tropical Medicine and Hygiene, Annals of Applied Statistics, Bioinformatics, Bioinformatics Advances, Biomedicine and Pharmacotherapy, Biometrics, Briefings in Bioinformatics, BMC Bioinformatics, BMC Supplements, Cell Reports Methods, Cell Systems, Cell Genomics, Cell & Bioscience, Communication Biology, Genes & Diseases, Genetic Epidemiology, Genome Biology, Journal of Applied Statistics, Journal of Alzheimer’s Disease, Meta Gene, Nucleic Acids Research, NAR Genomics and Bioinformatics, PeerJ, PLOS Genetics, PLOS ONE, RECOMB, Statistical Analysis and Data Mining, Scientific Reports, Statistical Methods in Medical Research, Statistics in Biosciences.

Professional Membership

American Statistical Association (ASA)

The International Biometric Society — Eastern North American Region (ENAR)

International Chinese Statistical Association (ICSA)

International Society for Computational Biology (ISCB)

American Society of Human Genetics (ASHG)
